

Is your accounting software costing you more than you think?

As businesses grow, finance teams often feel the strain first. Reporting takes longer. Forecasting gets harder. More decisions depend on data that sits in too many places. Use this checklist to see whether your current software is helping finance lead – or holding finance back.

Reporting and visibility

Yes No

Does reporting take longer than it should each month?

☐
☐

Do teams spend more time gathering data than analysing it?

☐
☐

Are leaders asking for insights that take too long to deliver?

☐
☐

Consolidation and accuracy

Yes No

Is financial data spread across multiple systems, entities or locations?

☐
☐

Do reports need manual checking before finance can trust them?

☐
☐

Are spreadsheets still filling gaps your software should handle?

☐
☐

Forecasting and planning

Yes No

Is cash flow visibility harder than it should be?

☐
☐

Are forecasts built from stale or manually consolidated data?

☐
☐

Is it difficult to understand the financial impact of growth, rising costs or operational change?

☐
☐

Control and compliance

Yes No

Are audit preparation and compliance activities becoming more time-consuming?

☐
☐

Are governance and approval processes becoming harder to manage as the business grows?

☐
☐

Do manual processes create avoidable risk or rework?

☐
☐

Finance team capacity

Yes No

Is finance stuck reporting on the past instead of helping shape what happens next?

☐
☐

Are manual tasks limiting the team's ability to provide better insight?

☐
☐

Has growth increased complexity faster than your systems can support?

☐
☐

If you checked more than a few boxes, your accounting software may not be giving finance the visibility, control or confidence needed to support the next stage of growth.

Learn how MYOB Acumatica can help finance teams improve reporting, forecasting and business-wide visibility.
